## Data Base

The data is based on 2,600 stores
comprised of statewide chains, pharm chains, private market and convenience stores
which transmit their POS scan data on a daily basis to StoreNext and which represent more than $85 \%$ of the total sales in the

Israeli barcoded FMCG market
Based on this data, StoreNext uses an advanced statistic model to perform an extrapolation for
,100\% of the barcoded FMCG Market in Israel
.excluding Kiosks and the Arab sector

## Long Story Short

(3) April shows a growth of $6.0 \%$ in sales in the FMCG world compared to April last year, and excluding sales days, the growth stands at $10.1 \%$. The growth in sales in April reduces the decrease in the cumulative period, which stands at $1.9 \%$, compared to the corresponding period last year. Also, this period records a 4.4 point increase in StoreNext price index
§ The increase in StoreNext's price index is affected by a consistent increase in the index in recent months
© StoreNext's price index shows an increase in all fields, which stands out mainly in the fields of home care and beverages, due to the reforms in recent months, they are expected to contribute to the high level of the index later in the year
© Most of the fields show an increase in the current monthly sales compared to the sales in the corresponding month last year, which is greatly affected by the timing of Passover. In the current cumulative period, there is a mixed trend in sales change rate, both in key worlds in the field of food and beverages and in key worlds in the fields of personal care and home care

## Change in Sales and Price Indices

FMCG, YTD 2022 compared to YTD 2021
Change in StoreNext Price Index

* Real Quantitative Change - value sales growth deducting StoreNext Price Index changes (neutralized of mix effects)

## FMCG YTD Change Rate By Fields (2021 VS 2022)

$\widehat{\jmath}$ All fields are showing a real decline and the most significant decline is in the field of home care
$\widehat{0}$ StoreNext's price index shows an increase in all fields, while home care and beverages fields show a significant increase affected by reforms

[^0]

## Value sales Change Passover By Fields - 2022 vs 2021

$\widehat{\imath}$ All fields grow in sales throughout the entire period compared to the same period last year, the food field shows the lowest change, while beverages shows the highest change. Even during the holiday shopping period beverages field recorded the highest growth compared to last year while food field declined
$\square$ Pre holiday period ■ Holiday shopping period $\quad$ Passover and Hol HaMoed $\square$ Entire period

* Passover 2022 Compared to Passover 2021

## Passover sales - yearly comparison

§ Except for the week preceding the holiday, all weeks show an increase in the sales compared to the weeks in 2021
$\widehat{\jmath}$ The most noticeable growth is in the holiday week and Hol HaMoed, while in the week before the holiday there is a slight decrease in FMCG sales compared to last year (-0.4\%)

[^4]
## Sales distribution by channels throughout the holiday

© The discount channel shows a decrease in the partiality of sales during the holiday and the holiday week, and at the same time significant increases of the neighborhood channel and convenience affected by trips and leisure of consumers which leads to more purchases and shopping "on the go" during this period

[^5]StoreNex
Looking Forward

## Next, we will examine the sales trends of the Passover categories

§ In order to examine the holiday trends, we will examine the holiday categories during the holiday shopping period (two weeks)

## Passover

## Passover Products

## Haroset <br> Matzah Passover cookies

Gefilte fish

## Hosting

Chocolate boxes
Wines and Tirosh
Disposable housewares
Disposable maps
Disposable napkins
Non-alcoholic beverages
Nuts

## Holiday Shopping Period - Sales Trends Holiday Categories

§ Passover products show a decrease in sales compared to the corresponding weeks last year. This trend is probably influenced by the rise of travel abroad on Passover this year, which reduced the number of families celebrating the holiday in Israel. On the other hand, hosting categories show an increase in sales in the two weeks of holiday shopping in 2022

[^6]
## Holiday shopping period - holiday categories change rate

$\widehat{3}$ Out of all the categories, there are 3 that show growth during the holiday shopping period compared to the same period last year disposable housewares, non-alcoholic beverages and gefilte fish

Change rate in sales Holiday shopping period for the years 2022-2021

## Holiday shopping period - holiday categories change rate

〔 Although all growing categories show an increase in the effective average price ** during the shopping period of 2022 compared to the same period last year, it is evident that gefilte fish shows stability in quantitative sales * (growth of $0.2 \%$ ) while nonalcoholic beverages and disposable housewares show a significant decreases in quantitative sales which are affected by the deposit law on large beverage bottles, the soft drink reform and the one-time tools reform
